OPTYGON
Automate your business

Intralogistics Sales Optimization
Autodesk AutoCAD® Plugins & Libraries | 3D CGI Rendering

Massive time & cost savings
Save valuable resources with intelligent components and automation

Minimize error potential
Avoid monotonous, repetitive work

Reduce work steps
Concentrate on your solutions, not your workarounds!

We optimize your AutoCAD®

Specialists in technical planning need their software to be in the same impeccable condition as craftswomen & craftsmen need their tools.

Therefore, adapt your software to your trade and optimize your daily business in terms of time and quality.

Easy & intuitive handling
Thanks to customized object templates

The advantages are obvious!

- Reduce your lead times by **up to 50% and more***.

- The integration of optimization measures is as simple as possible: **Plug & Play**

- Easier to understand solutions thanks to supporting **3D geometry**

*Based on benchmarks in direct comparison between Optygon tools and industry-standard AutoCAD® blocks and workflows.

Our AutoCAD® services at a glance

- **Dynamic blocks**
  Dynamic blocks form the backbone of any effective planning and support simple and intuitive handling.

- **Block libraries**
  Customized user interfaces for inserting dynamic blocks make you even faster.
  Creating complex solutions becomes extremely easy.

- **Automation**
  Many manual operations do not bring any added value, they are monotonous and take up a lot of time.
  With automation, frequently required routines can be performed automatically by AutoCAD®.

- **User interfaces**
  A well-organized toolbox saves time.
  With user interfaces, you can keep important tools for your daily work in one place.

Automate your business

Intralogistics Sales Optimization
Autodesk AutoCAD® Plugins & Libraries | 3D CGI Rendering

Short lead times
Our in-house pipeline enables fast processing.

High-quality images
Modern software enables breathtaking results

Industry insider included
Many years of experience and a passion for CGI come together.

We create 3D-CGI fast & easy

Does the creation of rendered images and videos take an extremely long time and is correspondingly expensive?

Not with us! Thanks to our specially developed tools and assets, we can guarantee fast processing for the creation of 3D-CGI.

Whether image or video: we provide you with breath-taking visualizations that deliver added value for you and your customers.

The advantages are obvious!

- Gain an advantage over the competition with **stunning visuals**

- Visualization ensures that your solutions are **easy to understand**

- **Eliminate errors before they occur!**
  Digital mock-ups and system flights save time-consuming and expensive adjustments on site.

Our CGI services at a glance

- **Static images**
  For customer presentations, press releases or internal training purposes.

- **Digital Mockups**
  Carrying out ergonomic and functional assessments using digital mock-ups avoids design errors and expensive adjustments during production.

- **Videos**
  With the help of system flights and process animations, you can give your customer an even better idea of what your solution looks like. Wow effect guaranteed!
